etisalat by e& PMO 360

At etisalat by e&, we believe that the foundation for any successful project lies in proper project management. Our Project Management Office as a Service (PMO 360) offering is fully integrated with our market leading framework. We understand the dynamics of the project delivery market and specialise in project and change delivery services, by providing high-quality and cost-effective services that deliver flexible, on-demand resources.

We bring PMO360, the ultimate solution for all your project management needs! It's designed to provide you with a comprehensive suite of services that can help you manage your projects more efficiently and effectively than ever before.

We understand that every business is unique, which is why we offer a range of customisable features and services to meet your specific needs. Whether you're a small start-up or a large enterprise, we can provide you with the services, tools and support you need to succeed.

We believe Agile and Traditional Project Management can co-exist to benefit both your delivery team and organisation.

While many firms focus on processes and governance, we focus on results.

Our proven approach

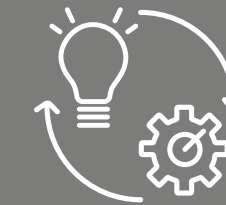

Discovery Phase

We look at key knowledge driplines of the current PMO to assess its capabilities. This allows us to gauge the existing level of PMO maturity and understand the key practices, capabilities and processes that are already in place.

Plan & Build

After this assessment, we produce a comprehensive report of our findings and recommendations. This includes a 100-day implementation plan defining the steps and actions needed to refine and improve your PMO practices. Keeping your business goals and strategy in mind, this plan lays a foundation for your organisation to work towards the desired maturity level with our PMO 360.

Implement

Our consultants will ensure the agreed PMO 360 service is embedded within your organisation. This includes building strong relationships with the business to guarantee your PMO 360 is valuable, rather than an obstacle to delivering results.
