

How to pair SHAKS2i controller with your Android Device (Phone, Tablet)

Your Device	LED Display	Bluetooth Name	Mode Switch
Android, Fire TV Stick		SHAKS S2i xxxx Android	

Attention! If the power is on, the mode will not be changed, even though you change the mode switch. The mode will be changed based on mode switch status when it reboots only.

Connect your device

Step 1:

Power on: Press 'Power button' for 3 seconds. When the gamepad is turned on by pressing the 'Power button', the default is Android mode. Change mode according to the above table. And follow step 2 based on the device you wish to connect. After the initial setup is complete, the gamepad will remember your device to connect automatically.

Step 2: BT Pairing:

Press the 'Pairing button' at the bottom for more than 2 seconds and find & select 'SHAKS S2i' on the device.

Connecting with an Android Device (Phone, Tablet)

- 1.** Mode Set-Up: Power off, change the mode to 'Android Switch' and power it on.
- 2.** Connecting: Please proceed "Pairing" process and check Bluetooth name "SHAKS S2i xxxx Android" in the paired list of your device. If there are paired devices before, gamepad will do "Reconnect".
- 3.** When "Pairing" is successful: LED signals #2,3 turn off and #1,4,5 light up.
